Project management is the process of leading the work of a team to achieve all project goals within the given constraints. This information is usually described in project documentation, created at the beginning of the development process. The primary constraints are scope, time, and budget. The secondary challenge is to optimize the allocation of necessary inputs and apply them to meet pre ...

Project management - Wikipedia

Time management skills are essential because few, if any, of us ever have enough time to do everything that is asked of us, or that we want to do. Time management is defined as using your time productively and efficiently—but what about when you are working as productively as possible, and you still can't get everything done?
