Neuroscience major undergrads need to have completed the Fundamentals of Neuroscience sequence. Instructor(s): E. Grove, P. Kratsios Terms Offered: Spring Prerequisite(s): For undergrads: NSCI 20110, 20120, 20130 and a basic understanding of Genetics, or "BIOS 20187" (Fundamentals of Genetics) is recommended, but not required.

Neuroscience < University of Chicago Catalog

Neuroscience is a multidisciplinary approach to understanding nervous systems at levels ranging from the molecular and cellular to the behavioral and cognitive. The program aims to provide high quality graduate training for students who come from a variety of undergraduate backgrounds but share an intense interest in nervous system research.

Philosophy of neuroscience is one natural result. This emerging area was also spurred by remarkable growth in the neurosciences themselves. Cognitive and computational neuroscience continues to encroach directly on issues traditionally addressed within the humanities, including the nature of consciousness, action, knowledge, and normativity.

Neuroethology is the evolutionary and comparative approach to the study of animal behavior and its underlying mechanistic control by the nervous system. It is an interdisciplinary science that combines both neuroscience (study of the nervous system) and ethology (study of animal behavior in natural conditions). A central theme of neuroethology, which differentiates it from other branches of ...

Computational neuroscience investigates how the brain computes. Researchers in this field of neuroscience use computer simulations and models to understand brain functions. ... Lecture-based classes teach students about the fundamentals of neuroscience and the related fields that inform it, including mathematical modeling, pharmacology ...

What Can I Do With a Neuroscience Degree? - DegreeQuery.com

Computational modeling is becoming an essential tool to study cognition, and neuroscience. The course will cover all the steps needed to fit computational models to data in a rigorous way. It will provide both theoretical knowledge, as well as hands-on experience (matlab or python), and will include a computational modeling project.
