In statistics, quality assurance, and survey methodology, sampling is the selection of a subset (a statistical sample) of individuals from within a statistical population to estimate characteristics of the whole population. Statisticians attempt to collect samples that are representative of the population in question. Sampling has lower costs and faster data collection than measuring the ...

Sampling (statistics) - Wikipedia

According to the standard account, C.S. Peirce gets credit for first proposing a pragmatic theory of truth, William James is responsible for popularizing the pragmatic theory, and John Dewey subsequently reframed truth in terms of warranted assertibility (for this reading of Dewey see Burgess & Burgess 2011: 4).

The Pragmatic Theory of Truth (Stanford Encyclopedia of

Two major new BBC programs, The Trick and the Hack That Changed The World, re-visit 2009 Climategate events on the eve of UK hosting the most recent international climate get-together. I was interviewed by The Hack and mentioned in The Trick as a villain. In today's article, I'm going to propose a theory of the...
