5. Results of borings and/or geophysical work performed to describe the nature of the subsurface geology and hydrogeology for the proposed landfill site, including the potential for unstable areas as described in 40 C.F.R. 258.15; and,

### CHAPTER 62-701

The surface of the planet Mars appears reddish from a distance because of rusty dust suspended in the atmosphere. From close up, it looks more of a butterscotch, and other common surface colors include golden, brown, tan, and greenish, depending on minerals.. The apparent colour of the Martian surface enabled humans to distinguish it from other planets early in human history and motivated them ...

Lineage Statement: The data in this file are a combination of original observations of hourly and daily accumulated precipitation. Precipitation values are checked and edited as necessary by an automated and manual edit. Processing Steps: Fischer-Porter precipitation gauges record data on punched paper tapes.

### U.S. Hourly Precipitation Data

Cables can be an essential component, even a lifeline, to electronic systems. If a cable goes down, the entire system can fail. With four critical factors impacting their performance — mechanical, electrical, environmental and application-specific — manufacturers have to make sure cables can survive severe conditions and perform reliably over the system's lifespan.
